

Who is targeted by DDoS attacks: of 5,500 companies interviewed

20% of companies with 50 or more employees admitted to at least one DDoS attack. This proportion varies from industry to industry, and those with the highest chances of being hit with such an attack are telecommunications companies (24%) and financial services organizations (22%). At the lower end of the scale, 11% of media and entertainment companies, 10% of real estate businesses and 9% of professional services have suffered from an attack.*
